XM radio is the best thing that ever came to the truckers that keep this country running. We need information on weather and traffic that is current and readily available. We also can listen to what we want, when we want with XM. With broadcast stations, just when something is on that we really want, the station fades out and usually it's not on another station we can receive. Try driving the deserts of Nevada, Arizona, New Mexico and Wyoming, not to mention Texas listening to broadcast radio.....it's not going to happen. We need XM Radio, we want XM Radio and we also PAY for XM Radio. Please, do our best to block and attempts to change it. We LOVE it just as it is.

Thank You
